

ARTIST STATEMENT

Through the use of textural substances, mark making, movement and color, I create acrylic mixed media paintings in many different genres, both abstract and representational.

My inquisitive and experimental nature often produces “unpredictable results”, bringing excitement, and at times turning my practice into an exploratory study that leads to the most interesting and unique works.

Inspiration often comes from a song lyric or verse that has been ruminating in my mind, and can sometimes be found embedded within the work.

Creating is a contemplative practice that allows me to reach deep within myself to express meaningful thoughts, aspirations, and life challenges, all the while pursuing what I ultimately long for... “Freedom”.

My desire is to create beautiful contemporary art that expresses my voice and draws its viewers into deeper reflection through the work.
